MICRO-MINIATURE SOLENOID VALVES

General Service Valves

Isolation Valves

Pinch Valves

Manifolds

ASCO Scientific is a leading manufacturer of high quality, Micro-Miniature Isolation, Pinch, and General Service valves for the reliable control of fluids and gases in medical equipment, analytical instrumentation, and industrial applications. Our valves are found in equipment such as:

- Liquid & Gas Chromatographs
- Clinical Diagnostic Equipment
- DNA Sequencers/Synthesizers
- Gas Analyzers

- Oxygen Concentrators/Conservers
- Ventilators
- Dental Equipment
- Environmental Controls

In addition to our comprehensive standard product offering, we have the ability to create customized products that provide the precise solution to meet your fluid control needs.

You can find more information on ASCO Scientific's products on the web at www.ascovalve.com in the product section or contact the sales office nearest you to review your specific application requirements.

10mm Miniature Rocker Isolation Valve

Manifold Mount

ASCO SCIENTIFIC®

The Series 067 is a 10mm wide manifold mount, miniature, rocker type, isolation valve designed to control the flow of aggressive chemicals or high purity fluids. The Series 067 offers the following benefits:

- Inert materials of construction, such as PEEK and FFKM
- Small internal volume
- Excellent flushability
- Self draining
- Low power consumption

Construction

Valve Parts in Contact with Fluids						
Body PEEK						
Diaphragm	FFKM or EPDM or FKM					

Electrical

Standard Voltages	12 VDC, 24 VDC
Power Consumption	2.5 W – 1 W* holding (*with power save electronics)
Duty Cycle Rating	Continuous
Electrical Response Time	<10 msec open or close
Ambient Temperature	50°F to 122°F (10°C to 50°C)
Electrical Connection	Spade terminals or lead wires (see Specification Chart for details)
Protection Rating	IP40

Valve

Internal Volume	13µІ
Fluid Temperature	25°F to 104°F (-5°C to 40°C)
Vacuum Rating	26 in-Hg at any port

Alternate Construction/Options

Many alternate constructions/options are available, including a variety of voltages, electrical connections, orifice diameters and port connections. ASCO Scientific can also custom design a valve for your specific application.

^(*) Types 1 & 2 with LED

2 = Vertical width: 5.08 mm

3 = Flying leads, 0.5 m long, 0.25 mm

Options

Manual operator (impulse-type) Normally open constructions (consult factory)

Installation

The solenoid valves can be mounted in any position without affecting operation. Installation/maintenance instructions are included with each valve.

Torque specifications for mounting screws is 5 in-lbs.

^{1 =} Horizontal width: 5.08 mm

Dimensions: inches

16mm Rocker Isolation Valve Manifold Mount

The Series 385 is a 16 mm wide, manifold mount, miniature isolation valve designed to control the flow of aggressive chemicals or high purity fluids. The Series 385 offers the following benefits:

- Compact manifold design saves space and reduces assembly time
- Prevents contamination of fluid sample, due to excellent flushing characteristics
- Rocker design significantly reduces erratic flow caused by pumping action in poppet style valves
- Available with inert materials of construction, such as PEEK and FFKM to handle aggressive chemicals or high purity media

Construction

Valve Parts in Contact with Fluids					
Body	PEEK				
Diaphragm	FFKM (Perfluoro Elastomer), EPDM or FKM				

Electrical

Standard Voltages	12, 24 VDC (+10%, -5%)
Power Consumption	4 Watts
Duty Cycle Rating	Continuous
Coil Insulation	Class F
Ambient Temperature	14°F to 140°F (-10°C to 60°C)
Electrical Connection	15" Lead Wire Assembly, DIN Terminals (2.8mm x .5mm, DIN 46340)
Protection Rating	Watertight (IP65) with DIN Plug Connector

Valve

Response Time	~20 ms (to open or close)
Internal Volume	67μL
Fluid Temperature	14°F to 140°F (-10°C to 60°C)
Vacuum Rating	FFKM: 20" Hg at any port EPDM or FKM: Consult ASCO for use with vacuum.

2 and 3-Way Rocker Isolation Valves

Threaded-Flat Bottom or Barbed Hose Bib Porting

ASCO Scientific's patented Series 458 rocker isolation valves feature a unique rocker diaphragm mechanism that shields the internal components of the solenoid from the fluid. The design forms an easy to flush, low volume internal cavity.

- Suitable for corrosive media that would attack valves designed for general service duty
- Prevents contamination of fluid sample, due to excellent flushing characteristics
- Rocker design significantly reduces erratic flow caused by pumping action in poppet style valves
- Standard built-in manual operator for testing or troubleshooting
- An air operated version is also available. In this version an air cylinder replaces the solenoid as the valve actuator

Catalog Number Description and Options

To Construct Catalog Number

- · Select base catalog number
- Insert voltage into the 5th, 6th, and 7th digits denoted by "xxx"

Examples

458103411ES = 2-way normally closed valve with bib ports, PSU flange, surface mounting and a 24 VDC coil

4582AIR22EP = 2-way normally open valve with #10-32 UNF flat bottom ports, PEEK flange, panel mounting and an air operator

458311542ES = 3-way valve with M6 flat bottom ports, PEEK flange, surface mounting and a 115 VAC coil with rectifier

Dimensions Solenoid Operated with Bib Flange: Inches [mm]

Solenoid Operated with Threaded Flange: Inches [mm]

Notes

- 3-way versions shown, 2-way versions are the same except they do not include the middle ports
- · Bracket for optional panel mount shown in dashed lines

Air Operated with Bib Flange: Inches [mm]

Air Operated with Threaded Flange: Inches [mm]

Notes

- 3-way versions shown, 2-way versions are the same except they do not include the middle ports
- Bracket for optional panel mount shown in dashed lines

3-Way "Resilient-Seal" Isolation Valves

1/4 - 28 UNF Porting, In-line Mount

The Series 462 is a 3-way, inert isolation valve designed to control the flow of corrosive or high purity fluids commonly found in analytical instrumentation. Its unique "Resilient-Seal" technology utilizes a soft FFKM (Kalrez*) seal, which virtually eliminates leakage caused by small particulate matter.

- Highly resistant to corrosive fluids, the only materials in contact with the media are PTFE, PEEK, and FFKM (Kalrez*)
- Low internal volume reduces the amount of costly reagents that are wasted
- Compact overall size (1" dia. x 1.6" height) saves valuable space in OEM equipment
- Low power consumption Less than 3 Watts

Construction

Valve Parts in Contact with Fluids			
Body	PEEK		
Disc	FFKM (Kalrez*)		
Diaphragm	PTFE		
Pin	PEEK		

^{*}DuPont Co. trademark

Electrical

Standard Voltages	12, 24 VDC +10%, -15%
Power Consumption	2.8 Watts
Duty Cycle Rating	Continuous
Coil Insulation	356°F (180°C)
Electrical Connection	26 gage lead wire

Valve

Response Time	20 ms at rated voltage
Internal Volume	34 μL from NC or NO port to common 12 μL from NC to NO port to seat 46 μL total
Vacuum Rating	29" Hg

Alternative Constructions

Many alternative constructions are available including a wide variety of voltages, electrical connectors, and materials of construction. ASCO Scientific can also custom design a valve for your specific application.

Contact your local ASCO sales office for more information.

Temperature Range:

Ambient & Media: 32°F to 122°F (0°C to 50°C)

Approvals:

Meets applicable CE directives

Specifications

Ports	Orifice Size (ins.)	Cv Flow Factor	Body Material	Maximum Pressure (psi)	Catalog Number	Watt Rating @ 20°C	Weight (oz.)
3-WAY UNIVERSAL OPERATION (Pressure at an	y port)					
1/4 - 28 UNF Flat Bottom	0.062	0.026	PEEK	30	462312PFxx	2.8	3.2
Notes "xx" Denotes place in catalog numb	er for voltage,	three characters m	ay be used when re	quired.			

Catalog Number Description and Options

To Construct Catalog Number

- Select base catalog number from table
- \bullet Insert voltage into the 9^{th} and 10^{th} digits denoted by "xx"

Example

462312PF24 = 3-way valve with PEEK body, .062" (1.57 mm) orifice, 1/4 - 28 UNF, flat bottom ports and 24 VDC coil

Dimensions: Inches [mm]

2-Way "TFE" Isolation Valves

1/4 - 28 UNF Porting, In-line Mount

The Series 190 & 330 are 2-way, normally closed isolation valves constructed with TFE materials, which makes them virtually impervious to chemical attack. The Series 190 is a single valve while the Series 330 offers the same valve in a 2, 3, or 4 position manifold configuration for use in chromatography, solvent selection, and process sampling.

- PTFE diaphragm shields the internal components of the solenoid from the media to handle the most aggressive fluids
- Compact size saves valuable space in equipment
- Low power consumption

Construction

	Valve Parts in Contact with Fluids
Body	PTFE
Seat	CTFE
Diaphragm	PTFE

Electrical

Standard Voltages	12, 24 VDC+ 10%, -5%
Power Consumption	2.9 - 3.8 Watts (12 watts for latching version)
Duty Cycle Rating	Continuous (Intermittent for latching version)
Coil Insulation	356°F (180°C)
Electrical Connection	26 gage lead wire

Valve

Response Time	~5 ms at rated voltage (2 watt coil)
Internal Volume	20 μL from port 1 to seat (not including port) 52 μL from port 2 to seat (not including port)
Options	 Magnetic Latching Single valve or 2, 3, and 4 position manifolds
Vacuum Rating	29" Hg

Alternative Constructions

Many alternative constructions are available and include a variety of voltages, electrical connectors, and materials of construction. ASCO Scientific can also custom design a valve for your specific application.

Contact your local ASCO sales office for more information.

Temperature Range:

Ambient & Media: 32°F to 77°F (0°C to 25°C) continuous duty up to 104°F (40°C) intermittent duty

Approvals:

Meets applicable CE directives

Specifications

1/4 - 28 UNF Flat Bottom	0.062	0.03	30	3302xxL304	4	12*	9.7

Notes

"xx" Denotes place in catalog number for voltage

Catalog Number Description and Options

To Construct Catalog Number

- Select base catalog number
- \bullet Insert voltage into the 5^{th} and 6^{th} digits denoted by "xx"
- Add number of solenoids (330 series only)

Examples

190212S30 = 2-way normally closed valve with 1/4 - 28 UNF, flat bottom ports and 12 VDC coil rated at 2.9 Watts

190224L30 = 2-way latching valve with 1/4 - 28 UNF, flat bottom ports and 24 vdc latching coil

330224S303 = 3, 2-way normally closed valves mounted on a manifold with 1/4 - 28 UNF,

flat bottom ports and 24 vdc coil rated at 3.8 Watts

^{*} Latching valves are designed for intermittent duty only. Wattage rating applies to 20 – 30 ms duration required to actuate valve. Once switched no additional power is required to hold the valve in its position.

Dimensions Series 190: Inches [mm]

Dimensions Series 330 2 Position Valve Manifold: Inches [mm]

Dimensions Series 330 3 Position Valve Manifold: Inches [mm]

Dimensions Series 330 4 Position Valve Manifold: Inches [mm]

Inert Isolation Type

2 and 3-Way "TFE" Isolation Valves

1/4 - 28 UNF, 1/8" and 1/4" NPT Porting, In-line Mount

The Series 368/364 are 2-way and 3-way isolation valves constructed with TFE materials, which makes them virtually impervious to chemical attack. The Series 368 is a compact construction with a 0.062" orifice to handle standard flow requirements while the Series 364 is a high flow construction with a 0.093" orifice to handle higher flow requirements.

- PTFE diaphragm shields the internal components of the solenoid from the media to handle the most aggressive fluids
- Compact size saves valuable space in equipment
- Low power consumption

Construction

Valve Parts in Contact with Fluids			
Body	ETFE, PTFE		
Poppet	PTFE		
Diaphragm	PTFE		

Electrical

Standard Voltages	12, 24 VDC+ 10%, -5% 115 VAC (with rectifier in lead wires)
Power Consumption	4.5 - 6.8 Watts 12 watts (Model 364)
Duty Cycle Rating	Continuous (Intermittent for latching version)
Coil Insulation	356°F (180°C)
Electrical Connection	22 gage lead wire

Valve

Response Time	10 to 20 ms at rated voltage
Internal Volume	36830 μL from seat to port10 μL between poppets
Vacuum Rating	29" Hg

Alternative Constructions

Many alternative constructions are available and include a variety of voltages, electrical connectors, and materials of construction. ASCO Scientific can also custom design a valve for your specific application.

Catalog Number Description and Options

To Construct Catalog Number

- · Select base catalog number
- Insert voltage into the 7th and 8th digits denoted by "xx"

Examples

3682NC1230 = 2-way normally closed valve with a 0.062" orifice, 1/4 - 28 UNF, flat bottom ports and 12 VDC coil rated at 4.5 Watts

3682311530 = 3-way valve with a 0.062" orifice, 1/4 - 28 UNF, Flat bottom ports and 115/50-60 VAC coil rectifier 364 3NO2430 = 2-way normally open valves with a 0.093" orifice, 1/8" NPT ports ad 24 VDC coil rated at 12 Watts

Notes
"xx" Denotes place in catalog number for voltage, three characters may be used when required

* Common port: vacuum to 30 psig • NC + NO Ports: Vacuum to 10 psig

Dimensions Series 368: Inches (mm)

Dimensions Series 364: Inches (mm)

The Series 8296 is a 2-way, high flow isolation valve designed to control the flow of aggressive liquids and gases in analytical, semiconductor, and environmental equipment. The Series 8296 offers the following benefits:

- Reliable operation with a wide variety of media due to inert wetted materials such as PEEK, PTFE, stainless steel, and FFKM
- High flow rates of corrosive or high purity fluids
- Higher pressure ratings than typical isolation valves
- Reduced chance of seat leakage with soft FFKM disc

ASCO SCIENTIFIC®

The Series 282 are 2-way, normally closed, high flow isolation valves designed to control the flow of aggressive liquids and gases in analytical instruments, clinical diagnostic analyzers, and bioinstrumentation. The Series 282 offers the following benefits:

- High flow rates for corrosive media service
- Capable of handling a variety of media with several body and diaphragm material options
- Reduced chance of seat leakage with resilient diaphragm materials
- Removable/Rotatable coil for easy service and installation

2-Way, High Flow, Isolation Valves

G1/4 Threaded Connections

The Series 282 are 2-way, normally closed, high flow isolation valves designed to control the flow of aggressive liquids and gases in analytical instruments, clinical diagnostic analyzers, and bioinstrumentation. The Series 282 offers the following benefits:

- High flow rates for corrosive media service
- Capable of handling a variety of media with several body and diaphragm material options
- Reduced chance of seat leakage with resilient diaphragm materials
- Removable/Rotatable coil for easy service and installation

Construction

Valve Parts in Contact with Fluids										
Body Glass-Fiber-Reinforced PP										
Seals	FKM									

Electrical

Standard Voltage	12, 24 VDC +10%, -5% 120/60 VAC +10%, -15%
Power Consumption	DC: 9 Watts AC: 8 Watts (23VA Inrush, 14VA Hold)
Duty Cycle Rating	Continuous
Coil Insulation	Class F
Ambient Temperature	14°F to 140°F (-10°C to 60°C)
Electrical Connection	DIN Spade Terminals
DIN Connectors	Size 18 mm, Form A (not included with valve, see page 75)
Protection Rating	IP65 with DIN Plug Connector

Valve

Fluid Temperature	14° F to 212° F (-10° C to 100° C)
Response Time	20 ms open or close
Maximum Viscosity	37 cSt

Plastic Body Solenoid Valves

Hose Bib, Compression or 1/4"

Male Flare Connection

ASCO SCIENTIFIC®

The 8260 Series is a 2-way direct acting valve available in a normally closed construction. They are available AC or DC operated with plastic bodies and can handle the challenges of harsh media. There are many optional features available including solenoid enclosures, electrical connections, alternate elastomers, and end connections. Dedicated constructions of the 8260 Series are suitable for the following applications:

- General Service (air, inert gas, water)
- Shielded Core

2-Way, High Flow, Lever Isolation

Slip-On Connections for 1/4" & 3/8" I.D. Soft Tubing

ASCO SCIENTIFIC®

The Series 283 are 2-way, normally closed and normally open, high flow isolation valves designed to control the flow of aggressive liquids and gases in analytical instruments, clinical diagnostic analyzers, and bioinstrumentation. The unique lever design of the Series 283 isolates the media from the solenoid components offering the following benefits:

- High flow rates for corrosive media service
- Better at handling media with small particulate than standard isolation valves
- Higher operating pressures
- Capable of handling a variety of media with several body and diaphragm material options
- Reduced chance of seat leakage with resilient diaphragm materials
- Removable/Rotatable coil for easy service and installation

Construction

Constr. Ref. 2

For use with 1/16" OD to 3/8" OD Soft Tubing

The Series 284 are 2-way, normally closed and normally open, solenoid operated pinch valves designed to control the flow of corrosive or high purity fluids in medical equipment, analytical instruments, and industrial applications. Pinch valves control fluid flow by locating soft tubing in a mechanism that "pinches" the tubing to block flow and releases to allow flow.

- Large open gap for high flow and handling of particulate media
- Zero dead volume prevents cross-contamination
- Electrical connections can be kept separate from fluid area via built-in panel mount bracket
- Built-in manual operator for easy tubing change out and testing
- Removable/Rotatable coil for easy service and installation

Valve Parts in Contact with Fluids					
Recommended Tubing	VMQ (Silicone), max. hardness 50 Shore A (Not supplied with valve. Sold separately, see page 74)				

Other Parts						
Body	Anodized Aluminum					
Pinch Mechanism	POM (reinforced acetal copolymer)					
Internal Solenoid Parts	Stainless Steel					
Core Tube	Nickel plated brass

Compact/Low Power - 2-Way Pinch Valves

For use with 3/32" OD to 3/8" OD Soft Tubing

ASCO SCIENTIFIC®

ASCO Scientific Series 388, 390, 397, and 401 are 2-way, normally closed, normally open and magnetic latching solenoid operated pinch valves designed to control the flow of corrosive or high purity fluids in medical equipment and analytical instruments. Pinch valves isolate the fluid from the valve components by locating soft tubing in a mechanism that "pinches" the tubing to block flow and releases to allow flow.

- Saves space in equipment with compact design
- Low power consumption to reduce power supply requirements
- Large range of tubing sizes available for various flow and pressure requirements
- Magnetic latching construction (Series 397) to maintain valve position with loss of power, eliminate coil heat rise, and extend battery life

Compact/Low Power - 3-Way Pinch Valves

For use with 3/32" OD to 1/4" OD Soft Tubing

ASCO SCIENTIFIC®

ASCO Scientific Series 373 and 443 are patented 3-way solenoid operated pinch valves designed to divert or select the flow of corrosive or high purity fluids in medical equipment and analytical instruments. The fluid is isolated from the valve components by means of silicone tubing and flow is controlled in either direction by the alternating pinching action of the solenoid.

- Saves space in equipment with compact design
- Low power consumption to reduce power supply requirements
- Large range of tubing sizes available for various flow and pressure requirements

Construction

Valve Parts in Contact with Fluids				
Recommended Tubing	Platinum cured silicone Durometer: 55+/-5 Shore A (Two 12" pieces of tubing supplied with each valve. Additional lengths available separately, see page 74)

3-Way Micro Solenoid Valve

M3 and M5 Porting, In-line or Manifold Mount

The Series 188 is a 3-way, 10 mm wide micro solenoid valve designed to be used in fluid power applications. Using air or other neutral gasses the Series 188 can be used to pilot other valves or cylinders.

- Compact manifold design saves space and reduces assembly time
- Low power consumption
- LED and electrical protection comes standard
- Manual override

Construction

Valve Parts in Contact with Fluids				
Body	Manifold Mount: Polyamide (PA), In-line: Brass			
Diaphragm	Nitrile (NBR)			
Internal Parts	Brass & Stainless Steel			
Manifold	Anodized Aluminum

3-Way Miniature Solenoid Valves

15 mm wide, Manifold Mount Construction

ASCO SCIENTIFIC®

The Series 302 is a 3-way, 15 mm wide, manifold mount solenoid valve designed to control the flow of air or inert gases to small cylinders or actuators. The Series 302 offers the following benefits:

- Compact 15 mm, manifold design saves space and reduces assembly time
- Low power consumption (0.5W)
- Built-in LED for indication of electrical operation
- Built-in surge suppression to protect sensitive equipment
- Manual operator for testing and troubleshooting

Construction

Valve Parts in Contact with Fluids					
Body	IXEF (polyarylamide)				
Seals	NBR, FKM				
Internal Solenoid Components	POM, PET, stainless steel, brass				
Manifold Interface Seal	Hytrel				

Standard Voltage	5, 12, 24, 48- VDC +10%, -15% (Leaded version availble in 24 VDC only. AC voltages available upon request)
Power Consumption	0.5, 1.0, 2.0 Watts (Nominal ratings without LED and surge suppression. Add 0.15W for versions with LED and surge suppression)
Duty Cycle Rating	Continuous
Coil Insulation	Class F
Ambient Temperature	See ambient temperature table.
Electrical Connection	AMP 2.8 x 0.5 with 9.4 mm spacing ISO 15217/DIN 43650C. 12" Lead wires
DIN Connector	Size 9.4 mm, Form C (supplied with valve)
Protection Rating	IP65 with DIN Plug Connector

Posiflow® Micro Proportional Valves

M5 Threaded Ports or Pad Mount Versions Brass body

ASCO SCIENTIFIC®

The Series 202 Posiflow® valves are 2-way, normally closed, micro solenoid valves designed to proportionally control the flow of air or other gases by varying the electrical input to the coil. They are available as stand alone valves with M5 thread ports or pad mount versions for manifold mounting.

- Ideal to precisely control flow rates in medical equipment and analytical instrumentation
- Compact construction saves valuable space in OEM equipment
- Low power consumption of 3 Watts
- Low hysteresis, excellent repeatability, and high sensitivity for precise flow control

Posiflow® Proportional Solenoid Valves

Brass or Stainless Steel Bodies 1/8" to 1/2" NPT

The 8202/8203 Series is a 2-way proportional valve available in a normally closed construction only. They are available as 24 VDC operated only with brass or stainless steel bodies. Flow rates are adjustable between 0% and 100% of rating. There are many optional features available including an ASCO electronic control unit and electrical connections. Dedicated constructions of the 8202/8203 Series are suitable for the following applications.

• General Service (air, inert gas, water, light oil)

Construction

Valve Parts in Contact with Fluids										
Body	Brass	303 Stainless Steel								
Seals and Disc/Diaphragm	FKM or NBR									
Core Tube	305 Stainless Steel									
Core and Plugnut	430F Sta	ainless Steel								
Springs	302 Stai	inless Steel								
Rider Rings	P	TFE								
Breaker Piece	Brass 303 Stainless S									

Electrical

Standard voltage: 24 VDC
Coil: Molded Class F (standard)
Coil resistance: 25 Ohm at 68°F (20°C)
Operating current: 100 - 500 mA
Electrical coil input: 0 - 24 VDC

Recommended PWM frequency: 300 Hz Air/Gas;

200 Hz Water/Light Oil

Hysteresis: <5% ① (<7.5% for 8203 Valves)
Repeatability: <3% (<1% for 1/8" NPT Valves)①
Sensitivity: <2% (<1% for 1/8" NPT Valves)①

Percentage of max. value with 24 VDC, PWM,
 300 Hz voltage supply at constant differential pressure.

Nominal Ambient Temperature Ranges:

 $14^{\circ}F$ to $104^{\circ}F$ (- $10^{\circ}C$ to $40^{\circ}C$) for 22.6 watt solenoid. $32^{\circ}F$ to $104^{\circ}F$ ($0^{\circ}C$ to $40^{\circ}C$) for 8.6 watt solenoid.

Series AM Manifolds & Assemblies

For use with Series M alves nodi ed luminum

The Series 451 are anodized aluminum manifolds to be used with ASCO Scientific's Series AM solenoid valves. The manifolds are available separately or as complete valve/manifold assemblies as listed below.

- Valves easily thread into manifold, reducing assembly time, eliminating potential leak points, and avoiding plumbing errors associated with tubing together stand alone valves
- Manifolds are constructed of corrosion resistant anodized aluminum
- Standard manifolds feature #10-32 ports to mate with metal or plastic fittings

Construction

Valve Parts in Contact with Fluids									
Manifold Material	Anodized Aluminum								
NC Manifold Ports	Brass								
Common Manifold Ports	1/8" NPT								

Manifold Assemblies & Manifold Only Part Numbering

Number of Stations	Valves Assembled to Manifolds	Manifolds Only	
4 451A04xxxxxx		4510017-01	
6	451A06xxxxxx	4510017-02	
8	451A08xxxxxx	4510017-03	
12	451A12xxxxxx	4510017-04	

Manifold Assembly Catalog Number Construction

Construct catalog number for valves assembled to manifold as follows:

- 1) Select generic catalog number from table above based on number of stations required.
- 2) Insert catalog number of Series AM valve required (see page 61)in place of xxxxxx.

Examples

6 station manifold with six AM4124 valves assembled Generic manifold assembly number 451A06 + valve catalog number AM4124 Complete catalog number = 451A06AM4124

Dimensions: Inches [mm]

Customized Solutions

alves & ssemblies

ASCO SCIENTIFIC®

Custom Manifolds & Assemblies

ASCO Scientific has the ability to work with you to design a custom manifold for your specific fluid control requirements. We can design manifolds that include our solenoid valves as well as other components such as fittings, pressure sensors, relief valves, etc. We can also provide drawings in electronic formats such as Autocad or Pro E. Once the design is finalized, we can supply the complete assembly tested and ready for installation into your equipment.

Special body configurations and materials

To fit in a tight space or mount exactly in your equipment, ASCO Scientific can create custom body configurations. In addition, we can supply our existing products lines with various body and elastomer materials based on your fluid compatibility requirements.

Electrical Connectors/Special Voltage

To simplify your wiring and reduce labor to install solenoid valves, we can provide our valves with any electrical connector you desire. We routinely provide valves with various connectors made by AMP, Molex, and other connector manufacturers.

Also, we can provide our valves in non-standard voltages and lower power consumption based on your specific application requirements.

Customer specific testing and cleaning

To ensure that our products perform as expected in your equipment, we can develop test procedures based on your exact requirements. Also, we can specially clean our valves and components to prevent contamination of the media in your equipment.

Tubing Guide Dimensions mm [ins.]

Accessories Electrical Connectors

ASCO SCIENTIFIC®

ASCO's electrical connection devices are designed using the DIN 43650/ISO 4400 or DIN 46244 (Pg 9P) form standards consistent with our solenoid valve coil designs and permitting industry interchangeability. Each size is available for user wiring or factory prewired installations. Other options include 1/2" conduits, and LED/VDR models.

Features

- Glass fiber reinforced polyamide housing and lid
- IP65 protection against moisture entry and washdown when properly installed with gaskets
- LED: <u>Light Emitting Diode</u>. A solid-state diode that emits light to indicate power to the connector
- VDR: Varistor absorbing the self-inductance of the coil. The VDR is there to protect the coil or controller against supply over-voltage or peak
- Maximum voltage 240 Volts

	1/2" conduit 1/2" conduit with LED PG 11 cable gland PG 11 cable gland with LED/VDR 120/AC-DC PG 11 cable gland with LED/VDR 240/AC-DC PG 11 cable gland with LED/VDR 24/AC-DC PG 11 cable gland with LED/VDR 48/AC-DC PG 11 cable gland with LED/VDR 48/AC-DC 4.5' leads with LED 120/AC-DC PVC 4.5' leads with LED 240/AC-DC PVC 4.5' leads with LED 24/AC-DC PVC 6' leads with North American outlet plug 6' leads with North American outlet plug (rotated 90 degrees)	1/2" conduit Ground Up 1/2" conduit with LED Ground Up PG 11 cable gland Ground Up PG 11 cable gland Ground Up PG 11 cable gland with LED/VDR 120/AC-DC Ground Up PG 11 cable gland with LED/VDR 240/AC-DC Ground Up PG 11 cable gland with LED/VDR 24/AC-DC Ground Up PG 11 cable gland with LED/VDR 48/AC-DC Ground Up PG 11 cable gland with LED/VDR 48/AC-DC Ground Up 4.5' leads with LED 120/AC-DC PVC Ground Up 4.5' leads with LED 240/AC-DC PVC Ground Up 6' leads with North American outlet plug Ground Up 6' leads with North American outlet plug Ground Up	1/2" conduit 1/2" conduit with LED PG 11 cable gland PG 11 cable gland With LED/VDR 120/AC-DC PG 11 cable gland with LED/VDR 240/AC-DC PG 11 cable gland with LED/VDR 240/AC-DC PG 11 cable gland with LED/VDR 24/AC-DC PG 11 cable gland with LED/VDR 24/AC-DC PG 11 cable gland with LED/VDR 24/AC-DC PG 11 cable gland with LED/VDR 48/AC-DC Ground Up 90° PG 11 cable gland with LED/VDR 48/AC-DC Ground Up 90° 4.5' leads with LED 120/AC-DC PVC Ground Up No 4.5' leads with LED 24/AC-DC PVC Ground Up No 6' leads with North American outlet plug Ground Up No 6' leads with North American outlet plug (rotated 90 degrees) Ground Up No

^{&#}x27;Available in 50 pack; part number 266615. *Also available in 9', 16', and 33' lengths. Consult factory.

Size 9.4 mm, Form C

Part Number	Description	Orientation	Rotatable	
88143581	PG 7 cable gland	Ground Up	180°	
AP2002-01	PG 7 cable gland LED/VDR 120-240/AC 50/60	Ground Up	180°	
AP2002-05	PG 7 cable gland LED/VDR 48-120/AC 50/60	Ground Up	180°	
AP2002-03	PG 7 cable gland LED/VDR 48-120/DC	Ground Up	180°	
97500024	PG 7 cable gland LED/VDR 6-48/AC-DC	Ground Up	180°	
E1091-04-59**	4.5' leads with LED 120/AC-DC PVC	Ground Up	No	
E1091-02-59**	4.5' leads with LED 24/AC-DC PVC	Ground Up	No	
88143567**	6' leads	Ground Up	No	
**Also available in 9', 16', and 33' lengths. Consult factory.				

Materials of Construction

ASCO SCIENTIFIC®

The following is general information for materials that are commonly used in ASCO Scientific solenoid valves. This information is not intended as a specific recommendation; factors beyond our control could affect valve operation or material properties of the components used in ASCO Scientific's valves may be different then the general material properties listed below.

Elastomers

NBR (nitrile, Buna-n)

NBR has excellent compatibility for most air, water and light oil applications. The standard compound is suitable for service in petroleum oils, air, water, mild acids, acetylene, kerosene, lime solutions, liquified petroleum gases and turpentines. Not recommended for highly aromatic gasolenes or acids. It has a useful temperature range of -4°F to 185°F (-20°C to 85°C).

FKM (fluorocarbon elastomer, Viton1)

FKM has a rather wide range of chemical compatibility. It is a fluorocarbon elastomer, which was primarily developed for handling hydrocarbons such as jet fuels, gasolenes, and solvents that normally caused detrimental swelling to NBR. FKM is not suitable for ketones, halogenated hydrocarbons or freon. FKM has a high temperature range similar to EPDM, but has the advantage of being somewhat more resistant to "dry heat". It has a useful temperature range of 0°F to 350°F (-18°C to 177°C).

EPDM, EPR (ethylene propylene)

Ethylene propylene is suitable for applications above the NBR temperature range, such as handling hot water and steam. It has a wide range of fluid compatibility and its useful temperature range is -10°F to 300°F (-23°C to 149°C). Ethylene propylene is not compatible with petroleum based fluids.

FFKM (perfluoroelastomer, Kalrez1)

FFKM has virtually universal chemical resistance. It is extremely resistant to swelling, a cause of most seal failures. Because of the elasticity (soft seal) associated with FFKM, a virtually unsurpassed seal is created. FFKM will retain elasticity even after long term exposure to temperatures up to 600°F (316°C).

VMQ (silicone)

Known as the only elastomer, which under certain conditions, can be utilized for both high and low temperature. Also handles hydrogen peroxide and some acids. VMQ is not suitable for steam service. Fluorosilicone compounds are noted to have better fuel resistance.

Plastics

POM (acetal, Celcon²)

Acetal resin type thermoplastics, which are extremely rigid but not brittle. They provide good toughness, tensile strength, stiffness and long life. They are odorless, tasteless, non-toxic and resistant to most solvents.

PBT (Valox3)

PBT is a crystalline thermoplastic polyester with excellent chemical resistance. It has outstanding dimensional stability with high heat resistance and low moisture absorption. PBT also has a high surface gloss with an inherent lubricity.

PPS (polyphenylene sulfide, Ryton4)

This resin has outstanding chemical resistance and no known solvents below 200°C. It has low friction, good wear resistance and high tensile strength.

PSU (polysulfone)

Known as one of the most heat resistant thermoplastics. It has excellent chemical resistance when used for inorganic acids, alkalies and aliphatic hydrocarbons.

PEI (polyethermide, Ultem³)

This resin has good heat deflection characteristics. Good chemical resistance to non-oxidizing acids and polar solvents. Questionable usage on alkaline solutions.

PEEK (polyetheretherketone)

High performance thermoplastic that has a continuous working temperature of 250°C. It has an excellent resistance to a wide variety of chemicals and solvents. PEEK has excellent flexural, tensile, and impact properties combined with outstanding fatigue resistance.

PTFE (Teflon1)

PTFE is virtually unattacked by any fluid. It has a very wide temperature range. PTFE is not easily fabricated and is known to have objectionable "cold flow" characteristics, which may contribute to objectionable leakage, particularly on gases.

ETFE (ethylene tetrafluoroethylene, Tefzel¹)

ETFE is a fluoropolymer resin with a chemical resistance similar to PTFE. It is a more rugged material than PTFE making it more suitable for valve bodies with threaded ports.

CTFE (chlortrifluoroethylene, Kel-f⁵)

Thermoplastic known for its excellent chemical resistance. It has near-zero absorption rate and a low coefficient of thermal expansion. This polymer structure can be used in temperatures ranging from -240°C to 200°C. It is nonflammable and liquid oxygen compatible.
